Information about Being in a Research Study
 Charles C. Cummings

An Eye-Tracking Study of Adult Temperament Differences in College Students

KEY INFORMATION ABOUT THE RESEARCH STUDY

Voluntary Consent: It is your choice to be in this study. You will not be forced to participate in this study. You can refuse to participate in this study or stop participating at any time without any negative consequences. You may choose to participate in the study, and you may choose to stop participating at any time. You will not be punished in any way if you decide not to be in the study or to stop taking part at any time. If you choose to stop taking part in the study, the information you have already provided will be used in our research unless you say otherwise.

Alternative to Participatory Participatory is voluntary, and the only alternative is to not participate.

Handy Abstract: The purpose of this research is to examine how long-term commitment impacts other facets of our personality, including liking and emotion regulation. We are attempting to determine if one factor (commitment), instead of two (commitment and liking), is behind these factors only. Additionally, this research aims to determine whether individuals before these factors can be considered true or false commitment.
