An Eye-Tracking Study of Adult Temperament Differences in College Students

KEY INFORMATION ABOUT THE RESEARCH STUDY

Voluntary Consent: The authors have sought to bring you to our attention for research only. We do not intend to perform a clinical study or conduct research that is directly related to diagnosis and management of patients. The study does not affect your care in the study, and you are free to choose to participate or not; that, there will be no personal injury or any way if you decide not to be in the study or to stop taking part in the study. If you choose to stop taking part in the study, the information you have already provided will be used in our research.

Alternative to Participatory Participatory is voluntary, and the only alternative is to not participate.

Handy Abstract: The purpose of this research is to examine how long-term commitment impacts other facets of our personality, including taking on emotion regulation. We are attempting to determine if one factor can serve as a proxy, instead of measuring multiple relationships between these factors only. Additionally, this research aims to determine if other related issues between these factors can be examined using a proxy relationship.
