An Eye-Tracking Study of Adult Temperament Differences in College Students

KEY INFORMATION ABOUT THE RESEARCH STUDY

Voluntary Consent: The authors have asked if finding you is of interest for research only. If the researcher is professor or clinician, they may be conducting research that is academic and comparable to research. The study should not be asked for in the study, and you may choose to participate for any reason that will be your own. If you choose not to be in the study, it is up to you. If you choose to be in the study, you choose to be in the study. The information you have shared will be used in research only.

Alternative to Participatory Participatory is voluntary, and the only alternative is to not participate.

Handy Abstract: The purpose of this research is to examine how long-term commitment impacts other facets of our personality, including taking on emotion regulation. We are attempting to determine if one factor can serve as a proxy, instead of measuring multiple relationships between these factors only. Additionally, this research aims to determine if other related issues between these factors can be examined using a proxy relationship.
