It can improve the final results and potentially benefits to research. The questionnaire will be emailed to you. If you have any questions about the questionnaire used in the study or if you have any concerns about your safety or safety scores, please let the experimenter know. Information about contacting services is located in the provided information sheet and the final safety checklist.

Participation: There is no fee for participating in this research.

Risks and Discomfort: There are no anticipated discomforts. But you might become tired and you might experience some discomforts while sitting at the computer. You will be given a 10-minute break every 30 minutes and you may stop at any time.

Possible Benefits: You can learn about your work habits, identify time-saving and time-consuming tasks. However, this research may help to understand how our environment can be used to improve information systems on a system. Systems that can detect and respond to user fatigue have the potential to improve both user experience and performance concerns in many domains, including education, military, aerospace, healthcare, emergency first response, and law enforcement.

RESEARCH PARTICIPANT INFORMATION

Participants are eligible to take part in this research if they are currently legal citizens, aged 18 and over, and have the necessary legal capacity to give informed consent. Participants are also required to provide a valid email address and a valid phone number.

MANUSCRIPT REPORTING

As responsible researchers under Clarkson University's Code of Ethics, we are required to report the results of our research. We will report the results of our research to the research community.

EQUIPMENT AND DEVICES THAT WILL BE USED IN RESEARCH STUDY

Data will be collected using a personal computer (laptop or desktop) with a high-speed internet connection. The computer will be used to collect data on the participant's performance. The computer will be used to collect data on the participant's performance. The computer will be used to collect data on the participant's performance.

PROTECTION OF PRIVACY AND CONFIDENTIALITY

The results of this study may be published in scientific journals, professional publications, or other media.

The information collected during the study will be used for research purposes only. The information will be stored in a secure location and will be destroyed after the study is completed. The information will be stored in a secure location and will be destroyed after the study is completed.
